Journal of ATMOSPHERIC AND TERRESTRIAL PHYSICS

Editor-in-Chief

MICHAEL J. RYCROFT, *College of Aeronautics, Cranfield Institute of Technology, Cranfield, Bedford MK43 0AL, U.K. (Fax: (0234) 750780)*

Regional Editorial Board

R. L. DOWDEN, *Physics Department, University of Otago, Box 56, Dunedin, New Zealand (Fax: (64) 3 4790964)*

R. A. GOLDBERG, *Laboratory for Extraterrestrial Physics, Code 696, NASA/Goddard Space Flight Center, Greenbelt, MD 20771, U.S.A. (Fax: (301) 286 1648)*

A. P. MITRA, *National Physical Laboratory, Dr K. S. Krishnan Marg, New Delhi 11012, India*

H. OYA, *Geophysical Institute, Tohoku University, Sendai 980, Japan (Fax: (81) 222 62 6332)*

A. REZNIKOV, *IZMIRAN, Troitsk, Moscow Region 142092, Russia (Fax: (7) 95 379 2534)*

E. V. THRANE, *Department of Electronics, Norwegian Defence Research Establishment, P.O. Box 25, Kjeller N-2007, Norway (Fax: (47) 6 80 72 12)*

T. E. VAN ZANDT, *United States Department of Commerce, National Oceanic and Atmospheric Administration, Atmospheric Dynamics, Environmental Research Laboratories, 325 Broadway, Boulder, CO 80303-3328, U.S.A. (Fax: (1) 303 497 5373)*

Editorial Advisory Board

B. R. CLEMESHA (*Brazil*)
E. FRIIS-CHRISTENSEN (*Denmark*)
B. HULTQVIST (*Sweden*)
S. KATO (*Japan*)
T. L. KILLEEN (*U.S.A.*)
K. LABITZKE (*F.R.G.*)
H. J. OPGENOORTH (*Sweden*)
M. A. SAUNDERS (*U.K.*)
R. W. SCHUNK (*U.S.A.*)
R. W. SMITH (*U.S.A.*)
P. TRISKA (*Czechoslovakia*)
R. A. VINCENT (*Australia*)

Publishing, Subscription and Advertising Offices

Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.
Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.
Published monthly plus additional issues in March and June.
Second Class Postage Paid at RAHWAY NJ and additional mailing offices. Postmaster send address corrections to Journal of Atmospheric and Terrestrial Physics, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Subscription Rates 1993

Annual institutional subscription rate (1993): £750.00 (U.S. $1200.00). Personal subscription rate for those whose library subscribes at the regular rate is available on request. Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. (Telephone: (0865) 794141; Fax: (0865) 60285).

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform, are available from Pergamon Press offices.

CONTENTS OF VOLUME 55

January **Number 1**

A. A. KUTEPOV and V. I. FOMICHEV: Application of the second-order escape probability approximation to the solution of the NLTE vibration–rotational band radiative transfer problem 1

V. I. FOMICHEV, A. A. KUTEPOV, R. A. AKMAEV and G. M. SHVED: Parameterization of the 15 μm CO_2 band cooling in the middle atmosphere (15–115 km) 7

H.-U. WIDDEL: A note on the working principle of rocket-borne nose tip d.c.-probes in the middle atmosphere 19

A. I. POGORELTSEV and S. A. SUKHANOVA: Simulation of the global structure of stationary planetary waves in the mesosphere and lower thermosphere 33

A. E. SUMNER: Meteor radar observations of horizontal wind power spectra and their variation with height 41

WEIXING WAN and JUN LI: Spectral behaviour of TIDs detected from rapid sequence ionograms 47

E. L. AFRAIMOVICH and M. YU. UDODOV: Travelling ionospheric disturbances and the effectiveness of powerful HF transmitters in ionospheric modification and radio location of the Moon 57

T. R. ROBINSON and F. HONARY: Adiabatic and isothermal ion-acoustic speeds of stabilized Farley–Buneman waves in the auroral *E*-region 65

S. V. SAZONOV: Nonlinear electrodynamic regime of the Rayleigh–Taylor instability in the equatorial ionosphere, accounting for ion inertia 79

A. B. SHVARTSBURG and L. STENFLO: The ionospheric Alfvén waveguide 89

A. S. BESPROZVANNAYA, TS. DACHEV, N. KILIFARSKA and T. I. SHCHUKA: Longitudinal effect on the shape of the main ionospheric trough in the disturbed period of 20–25 October 1981 93

A. V. KULIZHSKY and M. V. TININ: The field of high-angle rays in a large-scale, randomly-inhomogeneous ionosphere 99

YA. I. FELDSTEIN and YU. I. GALPERIN: An alternative interpretation of auroral precipitation and luminosity observations from the DE, DMSP, AUREOL, and Viking satellites in terms of their mapping to the nightside magnetosphere 105

Brief reports

E. I. GOLBRAIKH and S. SH. NIKOLAISHVILI: The role of the inversion population in barium cloud ionization in the upper atmosphere 123

G. V. GIVISHVILI and L. N. LESHCHENKO: *D* region depletions above the Persian Gulf 125

Book reviews 129

International Geophysical Calendar 1993 i

February **Number 2**

Review paper
O. AVASTE: Noctilucent clouds 133

K. HENRIKSEN, E. I. TEREZ, G. A. TEREZ, V. ROLDUGIN, T. SVENØE and S. H. H. LARSEN: On the stationarity of the ozone layer in Norway and U.S.S.R. 145

R. G. THOMAS: Rome rainfall and sunspot numbers 155

H. RISHBETH: Day-to-day ionospheric variations in a period of high solar activity 165

N. R. THOMSON: Experimental daytime VLF ionospheric parameters 173

K. S. VISWANATHAN, R. BALACHANDRAN NAIR and P. B. RAO: Simultaneous observations of *E* and *F* region electric field fluctuations at the magnetic equator 185

A. I. KASHIRIN, O. F. KLYUEV and G. P. MILINEVSKY: Artificial plasma cloud evolution in the low latitude ionosphere 193

March **Number 3**

ARECIBO INITIATIVE IN DYNAMICS OF THE ATMOSPHERE, AIDA ACT '89

C. O. HINES: Preface 197

J. W. BROSNAHAN: Gene Adams 201

J. W. BROSNAHAN and G. W. ADAMS: The MAPSTAR Imaging Doppler Interferometer (IDI) radar: description and first results 203

F. T. DJUTH and J. H. ELDER: The VHF meteor radar system used during the Arecibo Initiative in Dynamics of the Atmosphere (AIDA) campaign '89 229

C. O. HINES, G. W. ADAMS, J. W. BROSNAHAN, F. T. DJUTH, M. P. SULZER, C. A. TEPLEY and J. S. VAN BAELEN: Multi-instrument observations of mesospheric motions over Arecibo: comparisons and interpretations 241

R. G. ROPER, G. W. ADAMS and J. W. BROSNAHAN: Tidal winds at mesopause altitudes over Arecibo (18°N, 67°W), 5–11 April 1989 (AIDA'89) 289

J. C. BIRD, G. G. SHEPHERD and C. A. TEPLEY: Comparison of lower thermospheric winds measured by a Polarizing Michelson Interferometer and a Fabry–Perot spectrometer during the AIDA campaign 313

R. H. WIENS, S. P. ZHANG, R. N. PETERSON, G. G. SHEPHERD, C. A. TEPLEY, L. KIEFFABER, R. NICIEJEWSKI and J. H. HECHT: Simultaneous optical observations of long-period gravity waves during AIDA '89 325

L. M. KIEFFABER, D. R. FRIESEN, D. L. KNUTSON and A. W. PETERSON: Short gravity wave periodicities during AIDA 341

S. P. ZHANG, R. N. PETERSON, R. H. WIENS and G. G. SHEPHERD: Gravity waves from O_2 nightglow during the AIDA '89 campaign I: emission rate/temperature observations 355

S. P. ZHANG, R. H. WIENS and G. G. SHEPHERD: Gravity waves from O_2 nightglow during the AIDA '89 campaign II: numerical modeling of the emission rate/temperature ratio, η 377

D. Y. WANG, S. P. ZHANG, R. H. WIENS and G. G. SHEPHERD: Gravity waves from O_2 nightglow during the AIDA'89 campaign III: effects of gravity wave saturation 397

J. H. HECHT, T. J. KANE, R. L. WALTERSCHEID, C. S. GARDNER and C. A. TEPLEY: Simultaneous nightglow and Na lidar observations at Arecibo during the AIDA-89 campaign 409

D. C. SENFT, C. A. HOSTETLER and C. S. GARDNER: Characteristics of gravity wave activity and spectra in the upper stratosphere and upper mesosphere at Arecibo during early April 1989 425

C. O. HINES: Pseudosaturation of gravity waves in the middle atmosphere: an interpretation of certain lidar observations 441

J. D. MATHEWS, Y. T. MORTON and Q. ZHOU: Observations of ion layer motions during the AIDA campaign 447

YU TONG MORTON, J. D. MATHEWS and QIHOU ZHOU: Further evidence for a 6-h tide above Arecibo 459

YU TONG MORTON and J. D. MATHEWS: Effects of the 13–14 March 1989 geomagnetic storm on the *E* region Tidal Ion Layer structure at Arecibo during AIDA 467

J. D. MATHEWS, Q. ZHOU, C. R. PHILBRICK, Y. T. MORTON and C. S. GARDNER: Observations of ion and sodium layer coupled processes during AIDA 487

T. J. KANE, C. S. GARDNER, Q. ZHOU, J. D. MATHEWS and C. A. TEPLEY: Lidar, radar and airglow observations of a prominent sporadic Na/sporadic *E* layer event at Arecibo during AIDA-89 499

Q. ZHOU, J. D. MATHEWS and C. A. TEPLEY: A proposed temperature dependent mechanism for the formation of sporadic sodium layers 513

March/April **Number 4/5**

THE FIFTH INTERNATIONAL EISCAT WORKSHOP

A. SIIVOLA: Preface 523

H. RISHBETH and A. P. VAN EYKEN: EISCAT: early history and the first ten years of operation 525

G. WANNBERG: The G2-System and general purpose alternating code experiments for EISCAT 543

B. Z. KHUDUKON, E. D. TERESHCHENKO and V. M. SEMENOV: A VHF incoherent scatter receiving station at the Russian Polar Geophysical Institute: the current status and a brief description 559

V. GRASSMANN: The effect of different collision operators on EISCAT's standard data analysis model 567

V. GRASSMANN: An incoherent scatter experiment for the measurement of particle collisions 573

M. T. RIETVELD, H. KOHL, H. KOPKA and P. STUBBE: Introduction to ionospheric heating at Tromsø—I. Experimental overview 577

H. KOHL, H. KOPKA, P. STUBBE and M. T. RIETVELD: Introduction to ionospheric heating experiments at Tromsø—II. Scientific problems 601

K. RINNERT: A case study of the reaction of the auroral atmosphere to local energy inputs 615

J.-E. WAHLUND, H. J. OPGENOORTH, F. R. E. FORME, M. A. L. PERSSON, I. HÄGGSTRÖM and J. LILENSTEN: Electron energization in the topside auroral ionosphere: on the importance of ion-acoustic turbulence 623

F. R. E. FORME, J.-E. WAHLUND, H. J. OPGENOORTH, M. A. L. PERSSON and E. V. MISHIN: Effects of current driven instabilities on the ion and electron temperatures in the topside ionosphere 647

E. MALNES and N. BJØRNÅ: Enhancement of incoherent scatter gyro lines by suprathermal electrons 667

A. R. BREEN and P. J. S. WILLIAMS: Real and spurious anti-correlations between short-period variations of field-parallel and field-perpendicular plasma velocities in EISCAT data 675

P. J. S. WILLIAMS, T. S. VIRDI, R. V. LEWIS, M. LESTER, A. S. RODGER, I. W. MCCREA and K. S. C. FREEMAN: Worldwide atmospheric gravity-wave study in the European sector 1985–1990 683

T. S. VIRDI and P. J. S. WILLIAMS: Altitude variations in the amplitude and phase of tidal oscillations at high latitude 697

S. Y. MA and K. SCHLEGEL: Nonlinear wave–wave interactions related to gravity wave reflection in the auroral upper *F*-region observed with the EISCAT radar 719

T. SHIBATA and K. SCHLEGEL: Vertical structure of AGW associated ionospheric fluctuations in the *E*- and lower *F*-region observed with EISCAT—a case study 739

H. RANTA, A. RANTA, S. M. YOUSEF, J. BURNS and P. STAUNING: *D*-region observations of polar cap absorption events during the EISCAT operation in 1981–1989 751

E. TURUNEN: EISCAT incoherent scatter radar observations and model studies of day to twilight variations in the *D*-region during the PCA event of August 1989 767

T. TURUNEN, T. NYGRÉN and A. HUUSKONEN: Nocturnal high-latitude *E*-region in winter during extremely quiet conditions 783

A. T. AIKIO, H. J. OPGENOORTH, M. A. L. PERSSON and K. U. KAILA: Ground-based measurements of an arc-associated electric field 797

May **Number 6**

B. V. KRISHNA MURTHY, K. PARAMESWARAN, K. O. ROSE and M. SATYANARAYANA: Temperature dependences of stratospheric aerosol extinction at a tropical station 809

A. M. SIVKOV and G. M. SHVED: Influence of latitudinal and longitudinal variations of ozone and water vapour on the solar semidiurnal tide 815

YU. I. PORTNYAGIN, J. M. FORBES, G. J. FRASER, R. A. VINCENT, S. K. AVERY, I. A. LYSENKO and N. A. MAKAROV: Dynamics of the Antarctic and Arctic mesosphere and lower thermosphere regions—I. The prevailing wind 827

YU. I. PORTNYAGIN, J. M. FORBES, G. J. FRASER, R. A. VINCENT, S. K. AVERY, I. A. LYSENKO and N. A. MAKAROV: Dynamics of the Antarctic and Arctic mesosphere and lower thermosphere regions—II. The semidiurnal tide 843

J. K. HARGREAVES, A. V. SHIROCHKOV and A. D. FARMER: The polar cap absorption event of 19–21 March 1990: recombination coefficients, the twilight transition and the midday recovery 857

R. I. BARNES: HF observations of the vertical structure of mid-latitude spread-E_s 863

W. A. BRISTOW and B. J. WATKINS: Incoherent scatter observations of thin ionization layers at Sondrestrom 873

M. LOCKWOOD, I. W. MCCREA, G. H. MILLWARD, R. J. MOFFETT and H. RISHBETH: EISCAT observations of ion composition and temperature anisotropy in the high-latitude *F*-region 895

E. MJØLHUS: On the small scale striation effect in ionospheric radio modification experiments near harmonics of the electron gyro frequency 907

A. I. SUKHORUKOV: Approximate solution for VLF propagation in an isotropic exponential Earth–ionosphere waveguide 919

M. J. LAIRD: A note on ray curvature 931

Book reviews 935

June **Number 7**

THE FIRST PACIFIC REGIONAL STEP CONFERENCE

C. H. LIU and S. T. WU: Preface v

S. T. WU and F. S. WENG: Numerical modeling of the energy storage and release in solar flares 939

M. DRYER: Solar connection to transient interplanetary processes 947

J. K. CHAO, H. H. CHEN, A. J. CHEN and L. C. LEE: A 22-yr variation of geomagnetic activity and interplanetary magnetic field 959

L. C. LEE and C. Q. WEI: Interaction of solar wind with the magnetopause-boundary layer and generation of magnetic impulse events 967

J. R. KAN: On the cause of substorm expansion onset and the processes driving the substorm expansion phase 979

G. ROSTOKER: Low latitude signatures of substorm activity 985

G. O. WALKER and Y. W. WONG: Ionospheric effects observed throughout East Asia of the large magnetic storm of 13–15 March 1989 995

YINN-NIEN HUANG and KANG CHENG: Ionospheric disturbances around East Asian region during the 20 October 1989 magnetic storm 1009

M. MALLIS and E. A. ESSEX: Diurnal and seasonal variability of the southern-hemisphere main ionospheric trough from differential-phase measurements 1021

S. MIYAHARA, Y. YOSHIDA and Y. MIYOSHI: Dynamic coupling between the lower and upper atmosphere by tides and gravity waves 1039

C. H. LIU and C. J. PAN: New observational techniques for studying the dynamics of the middle atmosphere using the Chung Li VHF radar 1055

R. A. VINCENT: Long-period motions in the equatorial mesosphere 1067

M. A. GELLER, YUECHEN CHI, R. B. ROOD, A. R. DOUGLASS, J. A. KAYE and D. J. ALLEN: Satellite observation and mapping of wintertime ozone variability in the lower stratosphere 1081

June **Number 8**

KEY QUESTIONS ON MAGNETOSPHERIC PHYSICS AND SUBSTORMS

Y. KAMIDE: Preface 1089

R. L. MCPHERRON and D. N. BAKER: Factors influencing the intensity of magnetospheric substorms 1091

A. T. Y. LUI: What determines the intensity of magnetospheric substorms? 1123

R. PELLINEN: How does magnetospheric convection relate to the expansion onset of substorms? 1137

G. ATKINSON: How does magnetospheric convection relate to the expansion onset of substorms? 1151

J. S. MURPHREE, R. D. ELPHINSTONE, M. G. HENDERSON, L. L. COGGER and D. J. HEARN: Interpretation of optical substorm onset observations 1159

J. BIRN, M. HESSE and K. SCHINDLER: What determines the latitudinal extent of the auroral acceleration region? 1171

Z. V. LEWIS: Convecting towards the catastrophe of substorm onset 1185

July **Number 9**

F. S. KUO, K. E. LEE, H. Y. LUE and C. H. LIU: Measurement of vertical phase and group velocities of atmospheric gravity waves by VHF radar 1193

R. M. JOHNSON and J. G. LUHMANN: Poker Flat MST radar observations of high latitude neutral winds at the mesopause during and after solar proton events 1203

C. R. REDDI, K. RAJEEV and R. GEETHA: Tidal winds in the radio-meteor region over Trivandrum (8.5°N, 77°E) 1219

R. A. LANGEL, M. PURUCKER and M. RAJARAM: The equatorial electrojet and associated currents as seen in Magsat data 1233

J. HANUMATH SASTRI, K. B. RAMESH, D. R. K. RAO and J. V. S. V. RAO: Oscillations in *F*-region Doppler velocity in the dip equatorial region associated with ULF geomagnetic pulsations 1271

E. V. NIKITENKOVA and YU. P. MALTSEV: Ionospheric mechanism for the two maxima in the spatial distribution of Pc3 geomagnetic pulsations 1281

F. SIGERNES, D. A. LORENTZEN, C. S. DEEHR and K. HENRIKSEN: Modulation of the auroral proton spectrum in the upper atmosphere 1289

M. A. MIAH: Solar-induced variation of proton precipitation near the equator 1295

J. A. BENNETT and P. L. DYSON: On Pfister's theorem and its generalization 1307

Book reviews 1311

August **Number 10**

LUO YI and PEI-REN CHEN: Long period oscillations in the Equatorial Ionization Anomaly correlated with the neutral wind in the mesosphere 1317

S. P. NAMBOOTHIRI, A. H. MANSON and C. E. MEEK: Variations of mean winds and tides in the upper middle atmosphere over a solar cycle, Saskatoon, Canada, 52°N, 107°W .. 1325

R. L. DOWDEN and C. D. D. ADAMS: Size and location of lightning-induced ionisation enhancements from measurement of VLF phase and amplitude perturbations on multiple antennas 1335

M. N. VLASOV and V. E. DAVYDOV: Splitting of atomic oxygen height profiles by eddy diffusion 1361

L. X. WHITEHEAD and E. C. BUTCHER: On the relative heights of the Sq and L_2 current systems 1365

R. G. RASTOGI: Geomagnetic field variations at low latitudes and ionospheric electric fields 1375

M. V. USPENSKY, A. V. KUSTOV and P. J. S. WILLIAMS: The amplitude of auroral backscatter—III. Effect of tilted ionospheric layer 1383

C. F. DEL POZO, C. J. BURNS and J. K. HARGREAVES: Dual-beam EISCAT radar observations of the dynamics of the disturbed D- and E-regions in the early morning sector 1393

N. GLATTHOR: NO^+ enhancement in the auroral F-region during ion frictional heating events, found in EISCAT-CP1-data 1417

F. HONARY, A. J. STOCKER, T. R. ROBINSON, T. B. JONES, N. M. WADE, P. STUBBE and H. KOPKA: EISCAT observations of electron temperature oscillations due to the action of high power HF radio waves 1433

W. KRAIŃSKI: Time-dependent covariance matrix in irregular magnetic pulsations (IPCL) analysis 1449

H. MAVROMICHALAKI and A. BELEHAKI: Mechanisms and time-scales of the magnetospheric response to the interplanetary magnetic field changes during the 8 May 1986 substorm 1459

M. A. CLILVERD, N. R. THOMSON and A. J. SMITH: The influence of ionospheric absorption on mid-latitude whistler mode signal occurrence from VLF transmitters 1469

M. A. CLILVERD, T. D. G. CLARK, A. J. SMITH and N. R. THOMSON: Observation of a decrease in mid-latitude whistler mode signal occurrence prior to geomagnetic storms 1479

Book reviews 1487

September/October **Number 11/12**

IONOSPHERIC STRUCTURES AND PROCESSES: THEIR RELATION AND FEEDBACK TO THE MAGNETOSPHERE

A. RODGER and A. BREKKE: Preface 1491

Review paper
A. BREKKE and J. MOEN: Observations of high latitude ionospheric conductances 1493

J. WATERMANN, O. DE LA BEAUJARDIÈRE and F. J. RICH: Comparison of ionospheric electrical conductances inferred from coincident radar and spacecraft measurements and photoionization models 1513

G. A. STANEV and N. V. ISAEV: Analytical modelling of the electric field distribution in the high-latitude ionosphere 1521

N. F. BLAGOVESHCHENSKAYA and I. A. SHUMILOV: Fine structure of the high-latitude ionosphere in the cleft and cusp 1529

G. A. Zherebtsov, O. M. Pirog, O. I. Razuvaev, A. S. Besprozvannava and T. I. Shchuka: The dynamics of the poleward edge of the trough deduced using data from a meridional chain of vertical-incidence sounding stations 1537

Lj. R. Cander: On the global and regional behaviour of the mid-latitude ionosphere 1543

G. de Franceschi, C. Bianchi, G. P. Gregori, B. Zolesi and S. Pau: A 10 yr analysis on the planetary scale of the virtual height of the *F*-layer 1553

P. Aravindakshan and K. N. Iyer: Day-to-day variability in ionospheric electron content 1565

V. V. Kuznetsov, V. V. Plotkin, I. I. Nesterova and N. I. Izraileva: Universal variations of ionospheric parameters and the geomagnetic field: theoretical view and evaluations 1575

H. G. Demars, A. R. Barakat and R. W. Schunk: Comparison of generalized transport and Monte-Carlo models of the escape of a minor species 1583

J. Bošková, F. Jiříček, J. Šmilauer, P. Tříska, V. V. Afonin and V. G. Istomin: Plasmaspheric refilling phenomena observed by the Intercosmos 24 satellite 1595

J. M. Grebowsky, W. R. Hoegy and T. C. Chen: High latitude field aligned light ion flows in the topside ionosphere deduced from ion composition and plasma temperatures 1605

November **Number 13**

D. N. Baker, R. A. Goldberg, F. A. Herrero, J. B. Blake and L. B. Callis: Satellite and rocket studies of relativistic electrons and their influence on the middle atmosphere 1619

D. M. Schlapp and T. J. Harris: Lunar tidal analysis of 6 yr of mesospheric wind data at Adelaide 1629

J. E. Titheridge: Atmospheric winds calculated from diurnal changes in the mid-latitude ionosphere 1637

R. Sridharan, R. Sekar and S. Gurubaran: Two-dimensional high-resolution imaging of the equatorial plasma fountain 1661

N. Jing and R. D. Hunsucker: A theoretical investigation of sources of large and medium scale atmospheric gravity waves in the auroral oval 1667

Shen Chang-shou and Zi Min-yun: Model calculation and analysis of magnetosphere–ionosphere–thermosphere coupling 1681

J. Bošková, J. Šmilauer, F. Jiříček and P. Tříska: Is the ion composition of the outer ionosphere related to seismic activity? 1689

SMALL AND MEDIUM SCALE AURORAL DISTURBANCES AND THEIR RELATION TO MAGNETOSPHERIC BOUNDARY LAYERS

M. J. RYCROFT: Preface 1697

P. E. SANDHOLT: Magnetopause plasma transients: signatures in the auroral ionosphere .. 1699

H. LÜHR, W. BLAWERT and H. TODD: The ionospheric plasma flow and current patterns of travelling convection vortices: a case study 1717

J. WATERMANN, O. DE LA BEAUJARDIÈRE and H. E. SPENCE: Space–time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Søndrestrøm incoherent scatter radar observations 1729

R. D. ELPHINSTONE, J. S. MURPHREE, D. J. HEARN, W. HEIKKILA, M. G. HENDERSON, L. L. COGGER and I. SANDAHL: The auroral distribution and its mapping according to substorm phase 1741

A. L. KOTIKOV, A. V. FRANK-KAMENETSKY, YU. O. LATOV, O. A. TROSHICHEV, E. M. SHISHKINA, J. S. MURPHREE and R. D. ELPHINSTONE: Filamentary structure of the westward electrojet in the midnight sector auroral distribution during substorms: comparison with Viking auroral observations 1763

V. R. TAGIROV: Auroral torch structures: results of optical observations 1775

J. BOŠKOVÁ, F. JIŘÍČEK, J. ŠMILAUER and P. TŘÍSKA: VLF plasmaspheric emissions—'wave' signatures of inner magnetosphere boundaries 1789
